Bengaluru, India | +91 9738027546 | mailtomanojkumar07@gmail.com | [linkedin.com/in/manoj-kumar-analytics](https://www.linkedin.com/in/manoj-kumar-analytics) | github.com/MARCUS-00

PROFESSIONAL SUMMARY

Data Analyst with a Computer Science degree and hands-on experience across two end-to-end analytics projects — including a 99,441-order e-commerce data warehouse with 18 SQL analyses and Power BI dashboards — plus an ML research internship applying explainable models to 40 Indian equities. Skilled in SQL, Python, Excel, and BI dashboarding, with a track record of turning raw data into decision-ready, stakeholder-ready insights.

KEY SKILLS

Data Analysis, SQL & ETL, Data Cleaning, Statistical Hypothesis Testing, Time-Series Forecasting, KPI & Business Reporting, BI Dashboarding, Data Visualization, Root-Cause Analysis, Stakeholder-Ready Documentation, End-to-End Project Ownership, SDLC

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Data Analytics & BI: PostgreSQL, MySQL, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP), Business Intelligence & Data Visualization (Power BI, DAX, Tableau), Pandas, NumPy, Statistical Analysis & Hypothesis Testing (Mann-Whitney U), Time-Series Forecasting (Holt-Winters, SARIMA)

AI/ML: Deep Learning, XGBoost, PyTorch, TensorFlow, Keras, SHAP, FinBERT, OpenCV, Scikit-learn

Engineering & Tools: Docker, GitHub Actions (CI/CD), Git, GitHub, Jira, Flask, Streamlit, Jupyter, Optuna

WORK EXPERIENCE

Research Intern – C3I, PES University

Jan 2026 – May 2026

- Built an explainable, multimodal ML pipeline under faculty supervision, integrating price/technical indicators, fundamentals, news sentiment, and macroeconomic events into a 68-feature dataset to predict 10-day price direction for 40 Indian large-cap equities
- Engineered a per-stock sentiment-decay feature, statistically tuned via correlation analysis on training data only, avoiding lookahead bias across all 40 stocks
- Applied rigorous leakage-prevention and split-integrity checks throughout the pipeline, honestly reporting an ensemble AUC of 0.54 rather than overstating predictive power
- Backtested an ensemble model's trading signals against realistic transaction costs and a regime-adaptive confidence threshold, translating probabilities into a ranked, actionable daily stock watchlist
- Translated SHAP-based feature importances into plain-English, per-prediction explanations for non-technical end users

PROJECTS

E-Commerce Revenue & Customer Retention Analytics — Personal Project

2026

Python, PostgreSQL, SQL, Power BI/DAX, Docker, GitHub Actions | github.com/MARCUS-00/ecommerce-retention-analytics

- Built a full analytics pipeline on the Olist Brazilian e-commerce dataset (99,441 orders, 9 relational tables) – PostgreSQL 16 star-schema warehouse and Python 3.12 ETL with automated data cleaning and 10 data-quality tests, deployed via Docker and GitHub Actions CI
- Engineered 18 SQL business analyses using multi-table joins, CTEs, and window functions, and applied Mann-Whitney U hypothesis testing to show late deliveries are linked to significantly lower review scores (median 2/5 vs 5/5 on-time); identified a 3.0% repeat-purchase rate and 8.11% late-delivery rate as key retention metrics
- Walk-forward validated Holt-Winters/SARIMA demand forecasts against a seasonal-naïve baseline (baseline WAPE 0.2308 vs model 0.2310) and shipped the honest finding – the simpler baseline was not beaten – as the production recommendation

Early Detection of Osteoporosis using Dental X-rays (OsteoScan)

2025 – 2026

PES University | TensorFlow/Keras, EfficientNetB0, Flask, Docker, SQLite, GitHub Actions | Live: manojkumar724-osteoscan.hf.space

- Deployed a live X-ray screening application (Hugging Face Spaces, Flask) that classifies osteoporosis risk and auto-generates explainable, decision-ready PDF reports, validated by a 14-test automated suite with CI/CD via GitHub Actions
- Diagnosed the root cause of an inflated 97% accuracy claim – patient-level data leakage – and rebuilt evaluation via strict Leave-One-Source-Out cross-validation across 13 patients, producing a validated macro-F1 of 0.59 (61.5% accuracy) that beat a brightness-only baseline

EDUCATION

B.Tech, Computer Science – PES University, Bengaluru

2023 – Jul 2026

Diploma, Computer Science – Dayananda Sagar Institute of Technology

2020 – 2023
